Total: \$4.3M

## **SAFE HARBOR CRISIS CENTER EMPOWER CAMPAIGN**

**DOMESTIC VIOLENCE IS A PUBLIC HEALTH AND PUBLIC  
SAFETY ISSUE:**

- With the booming population growth in Davis County, incidents of domestic and sexual violence are also increasing
- Even before COVID-19, our requests for services were increasing by 40% each year
- After March 2020, the community's need for our services increased by an additional 50%
- These clients are also calling about much more dangerous situations
- Last fiscal year, Safe Harbor provided an essential continuum of services for 2,500 survivors and their children
- We are on track to double that number this fiscal year to 5,000 clients served with over 55,000 services

**WE DO NOT HAVE THE SPACE TO ASSIST THOSE WHO  
NEEDS OUR HELP!**

- Turning away people who are in danger is not acceptable
- To better meet these increasing needs we have embarked on a \$4.3 million campaign to double the capacity of our emergency shelter, and build the Lifeline Prevention Center
- The Lifeline Prevention Center, to be built on land donated by Intermountain Healthcare, will cost \$2.5 M and will allow us to provide services including safety planning, case management, therapy, and even help with protective orders
- These services can often allow victims and their families to stay safely in their homes
- This ability to keep people in their homes, without initiating homelessness, ultimately saves the state money and creates less trauma for survivors

**You can make this facility a reality, and we  
could begin construction this spring!**
